Financial application

The Financial Application (FIN) is an application for displaying financial information, submitting invoices and exchanging booking receipts. These can be found under the applications on the ONE.Konzern Business Platform www.vwgroupsupply.com.

Prerequisite for displaying the financial application is a registration on the ONE.Konzern Business Platform, which you can apply for under the following link: [partner registration](#)

At the VIN, participating companies make incoming invoices, outgoing credit and debit notes, open and processed delivery notes and payment receipts available to suppliers for overview and download.

This gives the supplier a comprehensive overview of the current status of its deliveries and services.

The processor is also displayed with his contact details for the respective documents, so that the supplier can find a direct contact person in case of queries.

In addition, the contact details of the technical and functional contact person as well as the contact persons for authorizations in the company (Company Admin) can be called up via the menu item "Contact Person".

As the latest feature, the FIN offers suppliers a free invoicing assistant for electronic invoice submission.

With this wizard, you have the option of sending invoices to AUDI AG electronically free of charge.
