

Volkswagen do Brasil - São Bernardo do Campo

February 06th, 2024

To: Suppliers of Volkswagen do Brasil.

The business perspective on the current global scenario demands even more agility and assertiveness in the communication between companies, while also requiring more effectiveness in the planning and coordination of the supply chain.

To enhance business data exchange between Volkswagen do Brasil and its Suppliers, we emphasize the need of EDI – EVN tool utilization.

Through the new WEB EDI Portal ([eEVN - Extended Enterprise Value Network \(t-systems.com.br\)](https://eEVN-ExtendedEnterpriseValueNetwork(t-systems.com.br))) automatically supports the information exchange process between Volkswagen do Brasil and its supply chain, eliminating the need for manual data exchange.

For this purpose, a Manual has been developed, which contains all the guidelines on how information should be placed into this system.

The deadline for implementation of this new system was 2023, with a final deadline of April 1st, 2024 the access and utilization of EVN System is mandatory, manual documents will not be sent via email anymore.

The access to above mentioned link is already available, your logistics contact person will be able to support you in case of doubts.

In accordance with Clause 4.3 of the General Conditions for International Purchase Orders and Clause 6 of the General Conditions (both available on the website:www.vwgroupsupply.com), the Supplier is responsible for submitting the Advance Shipping Notification (ASN) / Detailed Invoice on the portal provided by Volkswagen do Brasil and, through this same portal, it will be possible to track and monitor the transit of the parts.

Reinforcing that Volkswagen do Brasil will no longer send any manual information, such as next deliveries or pending deliveries, this you can see in the system.

The documents placed in the EVN System does not change the suppliers responsibilities of sending required import documentation as per current process.

To request an USER to EVN platform, an email must be sent to these 2 addresses: e.collaboration.suporte@t-systems.com.br / hotline.eevn.importacao.direta.vwbr.r.anc@volkswagen.com.br, informing Duns Number and email address of responsible contact person from the supplier.

If you have any questions regarding EVN system, a ticket must be open and for that you can use the same email addresses mentioned above.

We kindly ask all your efforts and cooperation to comply with VW Group requirements, ensuring the success of this operation.

We thank you for the partnership!

Kind Regards,

B. Janzen

Supervisor for Disposition Imported parts

E. Esplendor

Manager Supply Chain and International Logistics
