Segment Details

Introduction

With the introduction of the New Logistics Concept at Volkswagen and Audi the dispatch call-off (Versandabruf=VAB) is used for the first time in the format GLOBAL DELJIT. With the beginning of production in the new VW plant in Chattanooga, USA, the dispatch call-off will also be sent from there. The news had to be expanded due to a differing NLC process in Chattanooga. The changes have to be considered when delivering to this plant.

Function of the message

The VAB replaces the daily call-off and the AMES-T dispatch call-off in the **European companies of the VW Group**. The VAB is usually created one day before pick-up and sent to the supplier by EDI taking into account the operation timetable, the supplier and the production calendar. It can be transferred earlier due to holidays, etc. Irrespective of the agreed timetable, a special dispatch call-off can be transferred if there are any process deviations.

The VAB is therefore the binding delivery instruction for the supplier.

Contents

A dispatch call-off always refers to one carrier and one plant of the supplier. In addition to the released quantity and the pick-up date, variable data which are required by the supplier to create the pick-up sheet and the goods tag are also submitted.

Chattanooga: The VAB refers to n packages with identical manifest no. A VAB is sent for every item number and P lane number.

Furthermore the so-called pick-up sheet number is transferred. It is to be transferred as consignment reference number (SLB no.) in the delivery note data VDA 4913, SA 712, pos. 3 and EDIFACT DESADV, BGM+351, DE 1004.

Chattanooga: No PUS no. is transferred! The SLB no. is to be set by the supplier.

In the dispatch call-off the pick-up date at the supplier as well as the goods receipt date at the locations is specified.

Chattanooga: Only daily amounts will be transferred (DTM+2::+102).

If the called amount **cannot** be sent predictably, the supplier has to inform the responsible dispatcher of the receiving plant and an arrangement will take place. After correcting the VAB a new one will be sent again (identical VAB number, incremented version number, SG1, RFF+AAN).

Chattanooga: For deliveries to the plant Chattanooga no new VAB will be sent.

The packaging information and the delivery pre-advise are not transferred.

For deliveries to the plant Chattanooga the following deviations in the news structure have to be considered.

Not transferred:

- the transport ID (SG 1, RFF+AAO)
- the relation number (SG 1, RFF+AEM)
- the VAB no. (SG 1, RFF+AAN)
- the special transport number (SG 1, RFF+TIN)
- the Pick-up-Sheet no. (PUS/SLB) (SG 8, RFF+CRN)

The point of consumption (SG 10, LOC+159) will be transferred as line handling code in the PCI segment

New: SG 5 – packaging instructions + SG 6 packaging information

PCI:

- the progress lane,
- the supermarket handling code,
- the internal route number and
- the line handling code (point of consumption)

The data of the PCI segments are to be transferred to the Global Transport Label. Furthermore the progress lane has to be retransferred in the ASN (DESADV) in the PCI segment.

GIN+BU, DE 7402 = manifest no.

The manifest no. and the identical qualifier have to be retransferred into the ASN (DESADV).

You can find a complete and up-to-date directory of plant codes for the destination plants at Volkswagen AG in the closed area of the supplier portal of Volkswagen AG. You will need a user ID.

OFTP parameters

The OFTP parameters, file name etc. can be found at

http://www.vwgroupsupply.com/b2b/vwb2b_folder/supply2public/de/zusammenarbeit/edi_elektronischer/oftp_parameter/OFTP.html

This guide can be found on the internet at:

History

Version 2 as of 19.07.2010

Multiple changes in context with deliveries to the US plant Chattanooga. Deliveries to European plants are not affected.

Version 3 as of 22.10.2010

UNA According to the guidelines the UNA segment is transmitted

UNH Note in the UNH segment that UNA segment is not sent has been removed

Version 4 as of 01.10.2010

BGM C106, DE 1004 A document number is not transmitted

SG 8 RFF+ON Format old: n8 Format new: an..12

UNZ DE 0036 Remark that at VW the number of messages is always 1, has been deleted

Version 4.1 as of 8.02.2011

UNH; DE 0062 Improved definition of message reference number

old: Constant 1, format n1

New: Number of messages within on transmission beginning with 1, format n..14

Version 4.2 as of 01.03.2012

BGM, DE 1225 New: Cancellation code "1" added
